About

BIOGRAPHY

Dr. Aaron Trillo is a family medicine physician who cares for patients of all ages, from newborns to older adults. He enjoys caring for whole families and helping patients stay healthy through every stage of life. Whether it's a routine checkup, managing a long-term health condition or caring for an illness or injury, Dr. Trillo works alongside his patients to help them meet their health goals.

One of Dr. Trillo's greatest passions is caring for mothers and babies. With advanced training in maternity care and surgical obstetrics, he cares for patients throughout pregnancy, delivery and beyond. He values the opportunity to support families during some of life's most important moments and enjoys building lasting relationships with parents and their children.

As a first-generation Mexican American who speaks both English and Spanish, Dr. Trillo is passionate about caring for Spanish-speaking, immigrant and refugee communities. He believes everyone deserves access to quality healthcare and strives to create an environment where patients feel welcomed, respected and heard.

In addition to providing comprehensive family medicine care, Dr. Trillo performs a variety of office procedures, allowing patients to receive convenient care close to home.

Outside of medicine, Dr. Trillo enjoys spending time with his wife and their three dogs: Todd, an Australian Shepherd, Tuesday, a Blue Heeler and Tonks, a Black German Shepherd. He also enjoys fishing, archery, running, biking and cooking at home.

PHILOSOPHY OF CARE

Dr. Trillo believes the best healthcare begins with listening. He takes time to understand each patient's goals, concerns and unique circumstances so they can make healthcare decisions together. He believes patients should feel informed, supported and empowered to take an active role in their health.

For expectant mothers, Dr. Trillo's goal is simple: a healthy mom and a healthy baby. He works closely with each patient to provide personalized care and guidance throughout pregnancy and delivery.
