About

BIOGRAPHY

Dr. Brett Anderson is a hospitalist at Goshen Hospital who provides comprehensive care for adult patients during their hospital stay. He specializes in diagnosing and managing acute illnesses and complications of chronic conditions, ensuring patients receive timely, coordinated and compassionate care from admission through discharge.

Dr. Anderson works closely with a multidisciplinary team to develop individualized treatment plans that reflect each patient's unique medical history and personal circumstances. He is passionate about fostering clear communication between patients, families and healthcare providers, believing that trust and understanding are essential to healing.

Outside of work, he enjoys spending time with his wife and three children, tackling home improvement projects, experimenting with new recipes on the grill and staying active through sports—especially basketball, football and golf.

PHILOSOPHY OF CARE

Dr. Anderson believes that every patient deserves to be seen as a whole person—not just a diagnosis. He takes time to understand how a patient's medical, social and cultural background influences their health. His goal is to create a supportive environment where patients feel heard, informed and empowered in their care decisions.
